Roadmap

This roadmap displays our current projects and future plans. Its aim is to inform and assist our teams in planning their work.

What we're working on now

- Building the PIE documentation site minimum viable product (MVP)
  - Foundations
  - Navigation enhancements
- Identifying and fixing accessibility violations
- Supporting internal JET priorities
- Building out a proof-of-concept (PoC) for a native Web Component implementation of our PIE component system using the [Lit Web Component library](#)
- Laying the foundations of our web component library
  - Choosing the technology stack
  - Setting up our PIE monorepo
  - Building the Button component
- Improving our continuous integration/continuous delivery (CI/CD)
- Reorganising our Figma libraries

What's next

- Building the PIE documentation site
  - Search functionality
  - Component pages
  - Pattern pages
  - Accessibility section
- Rolling out and integrating our components into web applications across JET
- Continuing to identify and fix accessibility violations
- Supporting internal JET priorities
- Investigating web components

- Building the Modal component
  - Building the Form Field component

Future plans

- Maintaining and extending the PIE documentation site
  - Copy section
  - Component playground
- Building out the entire web component library
- Enhancing existing iOS and Android libraries
- Investigating design token tooling
- Supporting right-to-left scripts
